Select the document to be printed as instructed by Permitting Staff. You may need to double click. Generally it will be the document ending in APS or APS-STAMPED. There may be more than one.

ONE set of the drawings will need to be printed in full size, of whatever dimensions they were designed in, and in color. Check a number of copy and/or printing/reprographics establishments, if needed, as prices vary greatly. You may print more if you wish.

You might need to download the document to a stick drive and take to the location for printing. They may also provide an e-mail service then you pick up in person.

Have the printed drawing available for all inspections.

If further assistance is needed, please contact those directing you to print the drawings.

Good Luck with your project!
